What is UiPath?

UiPath is a robotic process automation platform for end-to-end high-scale automation. UiPath software offers solutions for enterprises to automate repetitive office tasks for rapid business transformation. It converts boring tasks into automation process using multiple tools. It was founded by Romanian entrepreneur Daniel Dines in the year 2005.

More and more companies are adopting Digital day by day. With digitization, the biggest advantage is the speed of execution. But the challenge with digitization is that it requires diverse tools and hence manpower with diverse skillset is required to handle those tools. But workforce having varied skill set is scarce. To resolve this issues the entire IT industry has been looking for reliable, fast, intelligent, robust solution. This demand is fulfilled by UI path.
